

ONYEDIKACHI H. OBIDIEGWU

Cloud Security Engineer | DevSecOps | Zero Trust Architecture

Lagos, Nigeria | +234 913 121 9185 | Kachi.Henry.Leo@gmail.com | leonardkachi.click | GitHub | LinkedIn

PROFESSIONAL PROFILE

Cloud Security Engineer with experience designing, securing, and automating cloud infrastructure across enterprise and startup environments. Holds AWS Certified Solutions Architect - Associate, CompTIA Security+, and ISC2 Certified in Cybersecurity credentials. Combines professional expertise in cloud security, DevSecOps, and infrastructure automation with a strong interest in distributed systems, software engineering, and multi-cloud security architecture. Seeking graduate-level Computer Science education to deepen theoretical foundations and support long-term research and professional development in secure, large-scale computing systems.

PROFESSIONAL EXPERIENCE

Draug Nigeria Limited

Operations and Cloud Security Engineer

Feb 2025 – Present

Lagos, Nigeria

- Designed the cloud security and digital infrastructure architecture aligned with NIST 800-53, ISO 27001, and GDPR frameworks to support Series A investment readiness and compliance positioning.
- Leading cloud infrastructure and security architecture design for D-SPARTA (Draug Smart Patrol Technology Architecture), an indigenous autonomous surveillance platform currently under development for public-sector and national security applications.

Torilo Academy

Cloud Computing Instructor

Mar 2026 – Present

Ikeja, Lagos (Saturday Sessions)

- Designed and delivers a structured cloud computing curriculum covering AWS architecture, infrastructure-as-code, containerisation, and security engineering principles for working professionals transitioning into technology careers.
- Achieved a 95% project completion rate across the first cohort of 30+ students; currently leading second cohort.
- Conducts hands-on labs in AWS, Terraform, GitHub Actions, and Docker, translating complex distributed systems and security concepts into structured, accessible instruction.

Neo Cloud Technologies

Cybersecurity and Solutions Architect Trainee

Jan 2024 – Jun 2025

Abuja, Nigeria

- Built foundational cloud security and architecture skills through a structured combination of supervised client work and technical training across enterprise AWS environments. Engagement was full-time January to December 2024, transitioning to part-time from January 2025 alongside Draug Nigeria Limited.
- Supported IAM policy implementation, CloudTrail audit configuration, and Security Hub findings triage across multiple client accounts under senior engineer supervision.
- Contributed to automated compliance checking workflows using AWS Lambda and SNS, reducing manual audit preparation time across client engagements.
- Completed Neo Cloud Cybersecurity Certificate — NC 04 Cyber Security (Dec 2024, Ref: NCT/CS/24/0463) and Solutions Architect Certificate — NC 26 Solution Architect (Jun 2025, Ref: NCT/IF/25/0634).

NYSC - National Youth Service Corps

Platoon Leader

Jun 2024 – Jul 2024

Benue State, Nigeria

- Appointed Platoon Leader during mandatory national service orientation camp, responsible for coordinating and managing a group of 100+ corps members. Served concurrently during a one-month break from Neo Cloud Technologies.

EDUCATION

B.Sc. Biochemistry

Chukwuemeka Odumegwu Ojukwu University, Anambra, Nigeria
CGPA: 3.34 / 5.0 | Second Class Lower | Medium of Instruction: English

Oct 2019 – Jun 2023

PROFESSIONAL CERTIFICATIONS

CompTIA Security+ (SY0-701)	Oct 2025
ISC2 Certified in Cybersecurity (CC)	Feb 2025
AWS Certified Solutions Architect - Associate	Apr 2026
Neo Cloud Technologies - NC 26 Solution Architect (NCT/IF/25/0634)	Jun 2025
Neo Cloud Technologies - NC 04 Cyber Security (NCT/CS/24/0463)	Dec 2024
AWS Certified Security - Specialty (Planned)	Aug 2026
Google Data Analytics Certificate	Dec 2023
Google AI Essentials Certificate	Dec 2023

TECHNICAL SKILLS

Cloud	AWS (EC2, S3, Lambda, IAM, GuardDuty, CloudTrail, Security Hub, VPC, Config, SageMaker, Kinesis, Organizations), Azure, GCP
Security	Zero Trust Architecture, IAM & SCPs, SIEM, SOAR, Threat Modeling, Nmap, Wireshark, OpenVAS,
IaC & DevOps	Terraform, Ansible, CloudFormation, GitHub Actions, Jenkins, Docker, Kubernetes (EKS), CI/CD
Programming	Python, Bash, JavaScript, SQL, PowerShell, YAML
Observability	Prometheus, Grafana, ELK Stack, AWS CloudWatch
Compliance	NIST 800-53, ISO 27001, CIS Benchmarks, GDPR
Databases	MySQL, Oracle, DynamoDB, Redis
Networking	AWS VPC, Subnets, Security Groups, NACLs, Route 53, VPN

SELECTED PROJECTS

AI-Powered Threat Detection System [Python](#) | [TensorFlow](#) | [AWS SageMaker](#) | [Kinesis](#) | [Lambda](#) | [GuardDuty](#)

Designed a machine-learning-based threat detection framework for analysing CloudTrail and VPC Flow Log data within AWS environments. Implemented data ingestion, preprocessing, model training, evaluation, and deployment workflows using AWS-native services. The project explores the application of machine learning techniques to cloud security monitoring and threat classification.

Cloud Resource Map [FastAPI](#) | [Boto3](#) | [Docker](#) | [Terraform](#) | [AWS](#) | [Azure](#) | [GCP](#)

Multi-cloud resource visibility dashboard surfacing live service inventory, cost, and region data across AWS, Azure, and GCP from a single interface. Deployed via Docker Compose; used internally by a cybersecurity consultancy.

AWS Security Monitor [Python](#) | [Boto3](#) | [CloudTrail](#) | [Lambda](#) | [SNS](#) | [Security Hub](#)

Automated IAM policy drift and security group change detection tool built on AWS-native services. Triggers SNS alerts in real time on detected configuration drift, supporting earlier identification of exploitable misconfigurations.

Flask CI/CD Dual-Cloud Pipeline [Python](#) | [Flask](#) | [Docker](#) | [GitHub Actions](#) | [AWS App Runner](#) | [Azure Container Apps](#)

Production REST API with automated CI/CD pipeline deploying simultaneously to AWS App Runner and Azure Container Apps on every push. Integrated structured logging and Azure Log Analytics observability.

AWS Three-Tier Architecture [Terraform](#) | [EC2](#) | [RDS](#) | [Application Load Balancer](#) | [Auto Scaling](#)

Load-balanced, auto-scaling three-tier web infrastructure on AWS provisioned using Terraform IaC, with multi-AZ deployment for high availability.

TECHNICAL WRITING

Published 50+ technical articles on AWS security architecture, DevSecOps, and infrastructure automation on Dev.to (Feb 2025 – Present). Maintained public GitHub portfolio of 30+ repositories with live deployment evidence and architecture documentation.
